

Transferring Grades - STARBURST

When a student has a schedule change a starburst  may appear next to the students' name in your grade book. If the starburst appears you now have 3 options on how to handle grades up to that point in your grade book.

*****If you manually enter a grade into the new course section prior to selecting a starburst option - you will lose the starburst option for this student going forward.**

1. You may exempt the student from all assignments completed prior to them entering your class.
2. If the student came from another teacher's class or another school district you may choose to click on the starburst.

Import Scores

[Redacted] was added on: 10/07/16

Enter walk in percentage grade:

Transfer scores from: ...

Assignment	Weight	Score	Import Assignment Scores Into
------------	--------	-------	-------------------------------

Import Cancel

This window appears and defaults to ENTER WALK IN PERCENTAGE GRADE. If you enter a percentage here the system will use this percentage and generate grades on the prior assignments to equal that percentage.

3. If the student transferred from another section of your course and the assignments you entered are the same then you may select the second option: TRANSFER SCORES FROM
In the dropdown menu select the course and section from which you want to transfer scores.
